REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The combination of claimed features in the independent claims was not found in the prior art. as follows: The combination of features in independents claim 25,36 and 47 not found in the prior art are as follows: The prior art taught plural processors processing instructions and using instruction FIFOs for storing instructions to be processed and checking for access conflicts during processing of load instructions, and not allowing load or other access instruction to execute until a conflict was resolved. However the combination of claimed features in the independent claims not found in the prior art are as follows: First FIFO and second FIFO both storing instructions associated with a first processor and a third FIFO associated with a second processor; providing a load instruction to the first FIFO for loading a register that is executed when the memory stored data has been delivered by the second processing unit; each load instruction being provided to the first FIFO for storage and other operative instructions for the first processing unit being provided to the second FIFO memory for storage; removing from the second FIFO an operative instruction involving the one register after having reached an output of the second FIFO if no earlier loading instruction for modifying a value of the one register associated with the instruction is present in the first FIFO memory, and in the presence of an earlier load instruction, then removing the operative instruction from the second FIFO memory after the loading instruction has been removed from the first FIFO memory.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Coleman whose telephone number is (703) 305-9674. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie Chan can be reached on (703) 305-9712. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
